Tethys Technology Wins Two Accolades during the 2017 Fund Technology and WSL Awards

TethysEMS™ 3.2.5 Release Wins "Best EMS" and Tethys Total TCA™ Slippage Attribution Models Wins for "Best Equities Trading Platform – Innovation"

NEW YORK – February 17, 2017 – Tethys Technology, an industry leader in financial software development for the multi-asset institutional trading markets was honored with two awards during the 2017 Fund Technology and WSL Awards:

- "Best EMS" for its TethysEMS™ 3.2.5 release for its high performance, multi-asset trading platform; and
- "Best Equities Trading Platform – Innovation" for Tethys' Total TCA™ Slippage Attribution product.

Presented on February 14, 2017 at 583 Park Avenue in New York, the Fund Technology and WSL Awards honor the achievements of financial technology providers catering to asset managers and institutional traders that have demonstrated exceptional customer service and innovative product development over the past 12 months.

Tethys understands the need for solutions that continually improve trading. Therefore, in August 2016, TethysEMS 3.2.5 was released offering improved order process speed, capacity and market data processing, while providing the lowest latency multi-asset EMS platform available today. Also in 2016, Tethys introduced its attribution-based TCA for quantitative managers - Tethys Slippage Attribution. As a framework of models, it generates data to help clients understand where slippage (or loss of alpha) is coming from for a given model or set of trades.

"Winning these prestigious awards validates our clients' success," said Nitin Gambhir, Tethys CEO. "For EMS, our success is comes from offering client solutions that facilitate and automate a wide variety of investment strategies. Our EMS features ever-expanding library of powerful analytics that directly help improve alpha capture and reduce execution costs. Our TotalTCA attribution model, introduced in 2016, is unique as it moves beyond simple cost measurement that traditional TCA tools do to actually identifying actionable steps that reduce slippage and variance."

WSL Institutional Trading Awards recognize excellence in institutional trade execution. They have expanded to reward the efforts of technology providers, data specialists and exchanges in meeting the needs of the global asset management community.
